I am one who can work very well both, as an individual and in a team. Hard work and enthusiasm are the two pillars that define the work that I do. With that, I have been able to work in situations even when minimal direction has been offered. Creating solutions to meet changing business demands is something I have been doing and am very comfortable with. I enjoy working with figures and have a high attention to detail. I have experience with both US GAAP and IFRS reporting standards. Being proficient in Microsoft Dynamics (Great Plains & Solomon) and SQL naturally makes me a fit for a Finance position.
